

SAMSUNG KNOX MDM

WORTMANN TELECOM GmbH will deliver the hardware and register the devices you have ordered. The selection and use of the software must be carried out individually by the ID user via the Samsung Knox portal or via the manufacturer.

Please note the following points to ensure a successful registration!

Necessary steps for your registration and device registration in the Samsung Knox portal:

1. Please check the Samsung Knox compatibility of the required devices and the KNOX solution at:
<https://www.samsungknox.com/de/knox-platform/supported-devices>
2. Register your company at:
<https://www.samsungknox.com/de>

Procedure after registering a KNOX ID / for an already registered KNOX ID:

1. Please contact us with your device request and let us know that KNOX registration is required. KNOX registration is not possible after the fact, so we need this information in advance when you make your request.

2. You will receive our device offer, plus the flat-rate costs for KNOX registration. The flat fee for registration is:
· € 4 per device
3. When you accept our quote, we will need the order confirmation and the KNOX ID to which the device should be registered.
4. Shipping will take place after successful registration.
5. The ID will be sent to both WORTMANN TELECOM GmbH and KNOX-MSP.

If you have any questions about Samsung Knox registration, please do not hesitate to contact your personal representative.

What is Samsung Knox?

Samsung Knox is a combination of a proven security foundation built into Samsung devices and a sophisticated suite of business solutions that utilize this platform, Secured by Knox.

Mobile Device Management (MDM) and Enterprise Mobility Management (EMM) are playing an increasingly important role in companies, which can be realized using Samsung Knox and the corresponding individually tailored solutions.

Samsung Knox - the MDM solution from Samsung

Mobile device management (or enterprise mobility management, EMM for short) significantly simplifies the management of mobile devices. Samsung Knox guarantees GDPR (General Data Protection Regulation) compliant implementation.

With Samsung Knox, Samsung offers a mobile security platform designed to protect against attacks. Samsung Knox is already integrated into modern Samsung devices at the factory (list of supported devices at: <https://www.samsungknox.com/en/knox-platform/supported-devices>).

Samsung Knox Manage, for example, offers the option of securing and managing iOS, Windows and other Android devices. In general, the Knox platform offers comprehensive platform protection at hardware level, a high level of user-friendliness and individual security solutions.

Samsung Knox: Software solutions at a glance

Samsung Knox includes a total of five different software solutions that provide a solution for device configuration as well as for mobile device management or EMM.

The service portfolio of the Samsung Knox platform includes the following software solutions:

- For efficient mass device configuration: **Knox Configure**
- For in-depth device customization: **Knox Customization SDK**
- For easy mass enrollment of devices: **Knox Mobile Enrollment**
- For easy management of mobile devices: **Knox Manage**
- For advanced configuration and management options: **Knox Platform for Enterprise**
